

# WHERE TO GO WHEN YOU ARE IN LABOR

## To Begin Your Birthing Journey

### Cape Coral Hospital

**Do not go to the emergency room or main hospital entrance.**

Enter through the entrance marked Birth Suites on the south side of the hospital. As you enter, take the elevators on your right to the second floor.

When you get off the elevator, the door to the Birth Suites will be locked. Hospital personnel at the desk will unlock the door for you. If hospital personnel are not at the door, push the button to the right of the front door. Hospital personnel will answer the intercom and ask why you need to enter the nursing unit. Say you are in labor and they will unlock the door.

**Someone is always present in the Birth Suites to welcome you as you begin your birthing journey.**

### HealthPark Medical Center

Go to the emergency department entrance and look for the OB Registration sign (upon entering the emergency department, walk straight ahead and the OB Registration sign will be on your right).

**Someone is always present in the OB Registration area to welcome you as you begin your birthing journey.**
